Dear Sir /Madam

I write as I am very interested in the Senior User Interface Engineer/UX Lead position I found online at your company.

My goal is to secure a position with a stable company such as yours where I can put my experience, training and skills to good use.I have worked in the role of Senior UI Engineer for the past many years of hardworking experience

I have extensive knowledge of UI technologies that include XML, HTML, and Java Script. I also have the knowledge to create interactive media design using Photoshop and the skills to turn these visual designs into CSS /HTML codes.

I have the ability to create interesting WebPages while keeping them user friendly. I have excellent time management and organizational skills with the ability to meet tight deadlines.

I am a self-starter with the ability to take control of the situation and work independently to get the job done. However, I am also a team player and I enjoy sharing ideas and information with other professionals in order to get the best possible results for all projects.

I think my CV presents the requirements you prefer
therefore I have included a current copy of my resume.

The attached resume contains a complete look at my educational background and work history along with my personal skills most relevant to this position. I am confident that I am the best candidate for this job and I hope to meet with you soon to discuss the particulars of this position in more detail.

You can reach me for an interview by calling +94 77 29 72066

Thanks

Respectfully,
Mohan Uranga Ransinghe
